

Upon entering the Lin-antai Evacuation Gate on the left bank of the Keelung River, visitors will see a sign explaining the origin and the river remediation history of the Keelung River, enabling the public to get a better understanding of the place while enjoying their leisure activities. Dajia Riverside Park is established on a polder land overlooking a large area of greensward. The west-end was constructed into a metropolitan green park, with the most distinguishing feature being the riverside park extending from the Zhongshan Bridge to the Dazhi Bridge. The park's landmark, "Fountain of Hope" displays a fan-shaped water screen soaring as high as 25 floors. The fantastic water dance highlighted by sparkling neon lights, and the gorgeous, classical red architecture of the Grand Hotel serving as background, present an extraordinary and unforgettable night scene. This is one of the best locations downtown to visit with your family and love ones. For those who enter the park from the Meiti Evacuation Gate on the right bank, you will see drawings on the embankment illustrating the history of Keelung River. A night tour along the Keelung River brings you further enjoyment with the glaring Ferris wheel and night scenes of Neihu Science Park. Length: Left bank: 22.2 km; right bank: 20.6km

■Riding time: Left bank: about 90 min; right bank: about 80 min. The two banks are connected by Dazhi Bridge, Maishuai 1st Bridge, Rainbow Bridge and Chenggong

• MRT- left bank: From MRT Yuanshan Station (Danshuei Line), head in the direction of Minzu E. Rd. and Xinsheng N. Rd., take the culvert under the Zhongshan Highway and turn right. and get off at Mingshui Rd. Stop or Dazhi Pumping Station Stop.

· Bus- left bank: 1. Take bus 72, 222, or Brown 16, get off at Dajia Elementary School Stop and enter by the Lin-antai Evacuation Gate, 2, Take bus 262, 307, 505. 604, or Blue 10, get off at Zhuangjing Village or Fuyuan Pumping Station Stop and Station Stop. 2. Take bus 28, 284, Brown 1, or Blue 20, get off at Chenggong Bridge or Tanmei Elementary School Stop. 3. Guandu, Golden River Bank, and Bali Left Bank Bikeways

MRT Zhuwei Station

The remediated Guiziken Creek has a newly designed

bicycle path along the riverside. The MRT Qilian and Beitou stations allow people to carry their bicycles on holidays, and also due to the linkage between local scenic spots, this area has become one of the most popular recreational outing places in northern Taipei. The Guandu Nature Park, a valuable wetland park, is the biggest attraction of the Guandu Bikeway. In addition to the main resident species, mangroves, there are also many little fiddler crabs and mudskippers growing in the wetland. During the migration season of birds, the bird watching square and visitor center of Guandu Nature Park will provide information on the flocks of wild waterfowls migrating here for a warmer winter. The northward end connects to the Golden River Bank Bikeway and continues to the Danhai New Township. Or you can cross the Guandu Bridge to reach the Bali Left Bank is also a fine choice. Besides the beautiful landscape along the hihsanhang Museum of Archaeology way, don't forget to enjoy the charming sunset and gourmet seafood at Danshuei or Bali

■Length: 11.9 km in total, including the 5 km long Guiziken Creek

Riding time: Labout 40 min.

• MRT: 1. From MRT Qilian or Beitou Stations, travel towards Zhongyang S. Rd., Daye Rd., and Dadu Rd. for about 15 min to arrive at the entrance of the bikeway at the Dingbaxian Community, 2, From MRT Guandu Station, take bus S23, get off at Guandu Temple Stop and head towards the opposition direction. · Bus: Take bus 218, 266 or 302, get off at Dave Rd. Stop. and head towards Dadu Rd. to arrive at the entrance of the bikeway; direction and ride back.

until you reach the 7th section and Daye Rd. intersection; you will be arriving at the entrance of the bikeway. However, it is easier to find a parking space if you enter from the Zhixing Rd. in the Guandu Temple direction.

his is a fantastic ecological and bicycling route especially in winter time. You

Bicycle Safety Tips

1. Before you take to the road, please check the bicycle's brakes, seat height and tire

should be parallel to the ground surface. (Sit on the seat, hold the handlebars, press the brake levers, and stand slightly on tiptoe with one supporting leg to make the bicycle upright. Move one foot pedal up and the other down and lay one foot on the down pedal. The foot stepping on the down pedal should be naturally straight and slightly bent. Make sure the seat height is optimal for you and that there is enough room for both

*Tire pressure: Please check whether the tires are worn. Tires should be pumped up 2. Warm-up exercises are needed prior to bicycling. To prevent sport injuries and sore muscles, you should do a fitness workout especially for the neck, waist, legs, and joints of all limbs. You must wear a helmet.

3. Please follow traffic regulations, traffic signs and traffic signal lights. Always ride on the bicycle lane or slow lane (ride on the right side of the road when a slow lane is not available). Do not ride on sidewalks or ride reverse to the traffic flow. Please stop for any pedestrian when riding along pedestrian-bicycle shared paths. 4. Please stop, watch and listen at crossways, and slow down when passing

5. Please avoid riding at night, on rainy days and in conditions of poor

6. It is strictly prohibited to do dangerous actions such as zigzagging and unexpected turning. Before making turns, always check both sides and make warning signs for pedestrians and vehicles behind you. 7. Do not stand on the front or rear part of the bicycle. Do not carry any object

that may hinder your or other people's sight. 8. Always be ready to brake and stop. To prevent break locking and falling over, please brake repeatedly and progressively.

9. Do not use the derailleur when the bicycle is not moving. Shift speed before going up a steep slope and avoid using the derailleur when riding on a slope to prevent leg injuries and breaking the derailleur.

10. Always keep your fingers on the right place of the handlebars. Never let go of the handlebars except for making signs. 11. Do not ride side by side. Keep a safe distance from other bicycles.

12. Child cyclists should be accompanied by an adult who follow behind and

pay attention to the road. 13. Please bring a cell phone with you. You could use it in case of emergency

Shuang River Jingmei River Family Bikeway

Along the bikeways on both the left and right banks of Jingmei River you will find the Taipei Zoo, NCCU tennis court, fresh lawns and a clear river swarming with fish, which all make this route the most suitable for family outing. In addition, the Daonan Riverbank Park has a variety of sports facilities such as: basketball court, skating rink, badminton court, etc. Many local

residents come here to stroll, cycle, and/or do various exercises here, making it

Shezidao and ErChong Spillway Bikeways

Jingmei River

Shezidao is a sand bar located at the convergence of Keelung River and Danshui River. It is a place of agricultural and unsophisticated life where rice paddies and vegetable gardens compose beautiful countryside scenery. The bikeway built on the embankment appeals to many bicyclers. Tourists can overlook the surging convergence of Keelung River and Danshui River at the end section of the sand bar, with the sunset making river surface glitter gloriously, not to mention Mt. Datun and Mt. Guanyin in the distance stretching off to the furthest horizon. The southward path links to the left bank bikeway of Bailing River where you can find several large scale sports fields, and you may see some renowned teams doing their drills there. Shezidao Bikeway offers you both enchanting scenes and dynamic exercises.

The ErChong Spillway Circular Bikeway is 24km long in length. Once you ride through the cross-embankment way, you will enter the riverside Snunong Shengtai Par meadows of different themes that would take you hours to explore.

Shezidao: 9km; ErChong Spillway: 24km me:Shezidao: about 40 min; ErChong Spillway: about 100min.

• MRT: From MRT Jiantan Station, take bus Red 7 or Red 10 and get off at Qiaomei Stop: walk for about 10 min to reach the entrance of the Shezidao Bikeway. · Bus: Take bus 2, 215, 246, 536, or Red 10, get off at Oiaomei Stop and you are at · Car: From Taipei downtown: drive northwards on Yanping N. Rd. until you reach Sec. 7, cross Jingzikou, the entrance of Shezidao (or Shezi Elementary School), and you are at the entrance of the Shezidao Bikeway. · Car: From Taipei downtown: you can also take the Sanchong Riverside Expressway, and drive through the cross-embankment to reach the ErChong Spillway Circular

Because there is no sufficient area to lay a bikeway between the section from the Zhoumei Expressway overpass to the Taipei College of Maritime Technology, bicyclers need to ride cautiously especially along the general roadway in this section

Bike Entrance

Shuangxi Riverside Bikeway

Shuang River originates from Yangmingshan National Park. After flowing by Soochow University, the river flows north of the road, where the riverbank green park stretches forth. The riverside bikeway is built along two sides of the river and is a short, wellmaintained cycling trail closest to the residential area in the bikeway network of Taipei City.

The beautiful riverbank of Shuang River serves as a green tunnel that refreshes the body and soul of the citizens in the neighborhood. The left bank of Shuang River links to the right bank bikeway of Bailing Bridge. The riverside park at the Bailing right bank is a good place for American football games. It is now also a favorable green land for bicyclers who can ride all the way to Chengde Bridge and visit Sanjiaodu, the last sampan wharf in Taipei

Bikeway Profile

About 2.8km for both left and right banks.

• MRT: From MRT Zhishan Station or Shilin Station, head towards Shilin Bridge, and you will soon arrive at the entrance of the bikeway · Bus: Take bus Red 5, 206, 255, 260 or 285, get off at MRT Shilin Station, and ride your bike to enter the bikeway. · Car: Take Zhongshan N. Rd. towards Shilin direction until you reach the bottom of Fulin Bridge; turn onto the bikeway entrance.

Lin Liu-Hsin Puppet Theatre Museum

Dadaocheng Evacuation Gate

While riding on this bikeway built along Yanping Riverside Park at Dadaocheng Wharf, you will be able to visit the cultural heritage spots in the neighborhood: Dihua Street, Shiahai Chenghuang Temple, Lin Liu-Hsin Puppet Theatre Museum, Taipei Confucius Temple on the direction of Jiuquan St., and Bao-an Temple, etc. This is a route that takes care of your health and improves your humanistic vision. The scenic spots on the route include: Coffee Square at Dadaocheng Wharf, Tangshan sailing boat, wharf arch bridge, and the distant view of Danshuei river, etc. Another worthy route is associated with Blue Highway; you need to carry your bicycle onto the ferry to Guandu Wharf or even Danshuei Fishermen's Wharf and Bali Left Bank. That's how you can diversify your riverside bicycling trip. After riding past Huajiang Bridge, the bicycling path enters into another section, the bank of Xindian River. There are several bridges across Xindian River bringing you to the bicycling routes along Dahan River. An ambient mass of buildings highlights the value of this riverside park. The riverside scenes along Xindian River and Dahan River will give you a strong impression of "an oasis in the city". The riverside park
